- Abbe, R., 596-598
- Abbe flap, 593, 597
- cheek flaps with, 635-636
  - in columella lengthening, 482, 483, 586-587
  - compared to composite free graft lip-switch, 625-626
  - delayed, 184
  - with prolabium into columella, 701-703
  - after forked flap use, 637-639
  - as free graft, 619-625
  - hair growth after, 614
  - and lengthening of upper lip, 632
  - with lip scar into columella, 706-707
  - in median clefts, 740
- Millard's personal cases
- with cheek flaps, 635-636
  - delayed flap with prolabium into columella, 701-703
  - after forked flap, 637-639
  - with lip scar into columella, 706-707
  - in lip-shortening procedures, 672-677
  - primary flap, 183
  - and prolabium into columella, 636-637, 639-642, 646, 652-653, 661-663, 667-669, 681-682, 690-697, 699-701, 705, 708-709
  - and rhinoplasty, 648-651, 698-699
  - in tight upper lip, 704
- muscle function in, 603-606
- pedicle for, 600-602, 619
- philtrum-shaped, 613-614
- placement in bilateral clefts, 611-612
- postoperative handling of, 603
- precautions with, 614
- primary, 173
- delayed, 184
  - in full center of lip, 186
  - inserted into prolabium, 184-186
  - use by Clarkson, 185
  - use by Honig, 187
  - use by Viale-Gonzalez, 187
- with prolabium shifted into columella, 636-637, 639-642, 646, 652-653, 661-663, 667-669, 681-682, 690-697, 699-701, 705, 708-709
- with rhinoplasty, 650-651
  - from protuberant and scarred lower lip, 615-617
  - and reshaping of donor lower lip, 617
  - and rhinoplasty, 648-649, 698-699
  - in secondary correction, 422, 424
  - shaping for, 607-617
  - and shortening procedures for lip, 672-677
  - size of, 602, 682
  - split-tail design of, 608-609
  - in tight lip without prolabium, 704
  - unilateral, corrected with forked flap, 515-517
  - W-shaped, 609-611
- Abramson, P. D., cases of median clefts of lower lip and mandible, 811
- Abrasion, sandpaper, methylene blue marking with, 712-713

- Adams, L., objections to lateral flaps below prolabium, 136
- Adams, M., objections to lateral flaps below prolabium, 135-136
- Adamson, J. E.  
 case of median cleft, 757  
 mucosal flaps for labial sulcus creation, 473-474  
 preservation of vermilion parings, 157
- Adhesion procedures, 58-61, 175-182  
 acceptance of, 182  
 and creation of upper labial sulcus, 469  
 high, 59, 179-180  
 low, 60, 178  
 Millard method, 176  
 and muscle union with forked flap banking, 296  
 preliminary use of, 86-87  
 with primary forked flap, 269, 272-275  
 Randall method, 176-177  
 with small prolabium, 181  
 two-stage, without undermining, 60-61
- Adhesives, for extraoral traction, 46
- Agroskina, A. P., columella lengthening of, 492
- Ahfield, F., cases of transverse facial clefts, 770
- Airway maintenance, postoperative, 375-376
- Alar base of nose. *See also* Nose chondromucosal flaps for retracted columella, 577-580  
 flaring of, 589-590  
 grafts for columella, 562-563
- Albrecht, cases of oblique facial clefts, 782
- Alveoli, dental, and premaxillary protrusion, 13
- Ammon, cases of median clefts of lower lip and mandible, 810
- Anatomy  
 of bilateral cleft, 19-40  
 in complete cleft, 27, 37-38  
 described by King, 22  
 histological picture in, 24  
 in incomplete cleft, 27  
 lip in, 23-30  
 motor nerves in, 28  
 muscle anatomy in, 25, 26  
 muscle discrepancy in, 23-24  
 nasal deformity in, 30-31  
 orbicularis oris muscle fiber direction in, 24-25, 26  
 prolabium in, 23  
 sensory nerves in, 26-28  
 Simonart's band in, 20-21  
 surgical problems with, 36-37  
 variations in, 37  
 vascular patterns in, 28-30  
 of nasal secondary deformities, 477-479  
 of normal face, 31-36  
 measuring of, 33, 36  
 racial comparisons in, 36
- Anesthesia, local  
 for Abbe flaps, 626  
 for early surgery, 83
- Antia, N.  
 on positioning of premaxilla, 72  
 use of Abbe flap, 186, 603
- Antibiotic ointment, postoperative use of, 377
- Antueno, J., correction of whistling deformity, 456
- Apfelberg, D. B., partial premaxillary excision of, 56
- Apfelstaedt, classification of median clefts, 728
- Arem, A., 279
- Arhinencephaly, 736
- Arm restraints, postoperative use of, 376
- Arons, M. S., correction of whistling deformity, 456
- Asepto syringe, for postoperative feeding, 377
- Ashley, L. M., cases of median clefts of lower lip and mandible, 811
- Asymmetrical bilateral clefts  
 closure with banking of fork

- basic rules in, 341-342
- on complete cleft side, 342-348
- conversion of incomplete to complete cleft, 355-357
- flap 1 in, 346-347, 351, 355
- incising of prolabium in, 352
- on incomplete cleft side, 348-351
- and lateral lip elements
  - matched to prolabium, 344-346
- measuring and marking prolabium in, 342
- Millard's personal cases, 391-397
- mucosa "m" in, 352, 356
- scoring of forked flap in, 351
- vermillion flap "B" in, 348, 350-351
- with columella retraction, 580
- rotation-advancement method in, 194-199
- Asymmetries, with border scarring and abnormal nasolabial angle, 719-721
- Auricular grafts
  - for columella, 573-575
  - comparison of two types, 561-562
  - skin and cartilage in, 559-560, 570
  - skin and fat in, 560-561
  - subcutaneous flap with, 539
- composite, for nasal elevation, 293
- for nasal tip support, 566-567
- for philtrum contouring, 442-443
- for short upper lip, 629
- Axhausen, G., use of prolabium vermillion, 113-114, 302
- Baibak, G., case of median cleft, 750, 756
